Brainstorming & Idea Prioritization

Date	2-October- 2026
TeamID	6ab46978b5170a9b58b3f461
ProjectName	**Implement Client Script & UI Policy (Incident)**
Maximum Marks	3 Marks

Implement Client Script & UI Policy (Incident

Step 1: Brainstorm and Idea Listing

Each team member lists ideas and suggestions related to improving Incident data integrity, conditional field behavior, validation, and controlled record editing.

S.No	Team Member	Idea / Suggestion	Category	Group
1	Nidhila G S – Project Leader	Create a UI Policy that applies controls when Impact is High, including making Assignment Group mandatory.	UI Policy / Data Integrity	1
2	T S Ajith Rajaa – Team Member	Configure the Urgency field as read-only when the Incident Impact is High.	UI Policy Action	1
3	Jenish M – Team Member	Use an onChange Client Script to automatically set Urgency to High when Impact is High.	Client Script / Automation	2
4	Joshila D – Team Member	Use an onSubmit Client Script to prevent saving a High Impact Incident when Assigned To is empty.	Client Script / Validation	2
5	Arshana M – Team Member	Use an onCellEdit Client Script to prevent direct State changes through Incident list editing.	Client Script / Control	3

Brainstorming & Idea Prioritization

Step 2: Idea Prioritization

Group	Final Idea	Feasibility	Importance	Priority	Selected
1	High Impact UI Policy: Assignment Group mandatory and Urgency controlled	High	High	1	Yes
2	Client-side automation and Assigned To validation using onChange/onSubmit	High	High	2	Yes
3	Restrict direct State editing through list view using onCellEdit	High	High	3	Yes

The team evaluated the proposed ideas according to relevance to the Incident requirements, feasibility in ServiceNow, and importance to data quality and controlled user interaction. The selected ideas directly support the implementation, testing, and demonstration of the project.
