Maximum Marks	3 Marks

Assignment Group UI Policy Action
Implement Client Script & UI Policy (Incident)

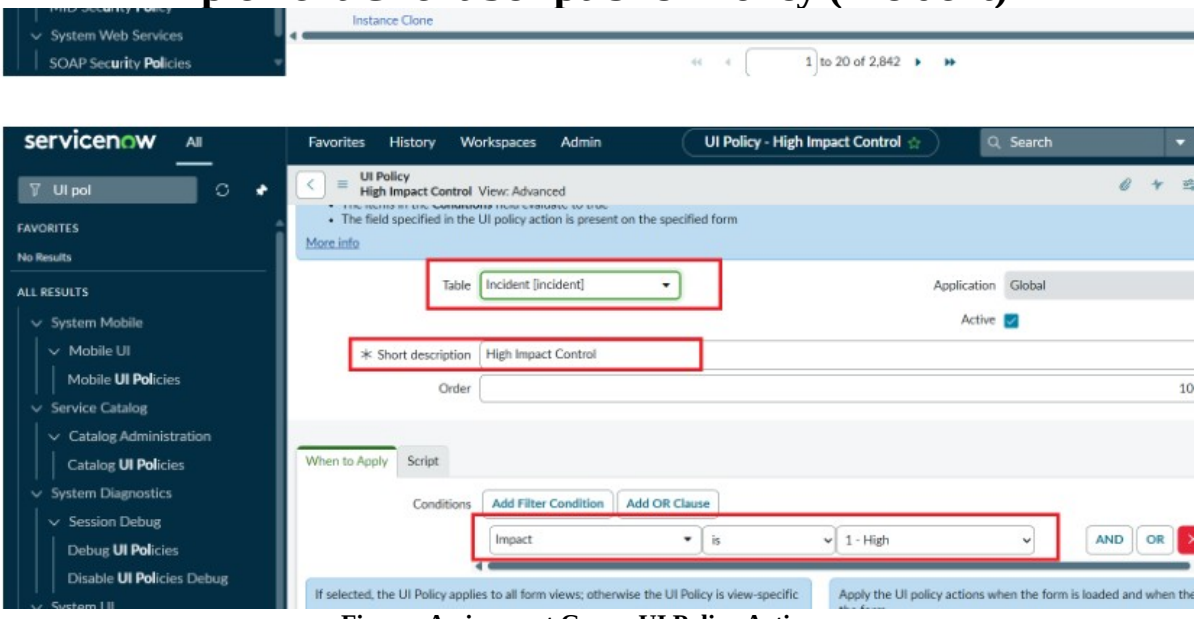

Figure: Assignment Group UI Policy Action

Configuration Description

The Assignment Group field is configured as mandatory when the High Impact condition is satisfied.

The figure shows the configuration of the **High Impact Control** UI Policy for the **Incident** table in ServiceNow. The policy is active and is configured with the condition **Impact is 1 – High**. When this condition is satisfied, the associated UI Policy Actions are applied to control the behavior of Incident fields.
